

T2 LED Color Temperature Controller

T2 is the 2.4GHz RF wireless synchronization color temperature controller which adopts LTECH multiple global initiate technology, the control system consists of two parts, the RF remote control and the receiver, realize the signal synchronization on unlimited receivers within effective distance, a very good solution for the LED project needs sync control wirelessly.

Can RF remote the functions of color temperature dimming, quick color temperature/brightness selection, DIY and delay off and so on. User-friendly color wheel for color temperature adjustment, unique LED state light for sync change indicated, user can simply know the LED working state from distance by checking the remote control.

1. Technical Specs:

T2 Remote Control

- Input Voltage: DC5V Built-in Lithium Battery
- Working Current: $\leq 30\text{mA}$
- Working Frequency: 2.4GHz
- RF Remote Distance: 30m
- Remote Option: sync control unlimited receivers

- Battery Capacity: 1000mAh
- Standby Time: ≤ 6 Months
- Dimensions: L145×W55×H22(mm)
- Package Size: L168×W102×H28(mm)
- Weight (G.W.): 200g

T3-CV Receiving controller

- Input voltage: DC5V-DC24V
- Max current load: 6A×2CH Max 12A (CT control)
- Max output power: 60W/144W/288W(5V/12V/24V)
- Compatible remote control: T1/T2/T2M/T3/T3M/T3X
- Working temperature: -30℃~55℃
- Dimension: L175×W44×H30(mm)
- Package size: L178×W48×H33mm
- Weight (G.W.): 140g

T3-CC Receiving controller (current 3 in 1)

- Input voltage: DC12V-DC48V
- Output voltage: DC3V-DC46V
- Output current: CC 350/700/1050mA ×2CH (CT control)
- Output power: 1.05W~48.3W ×2CH Max 96.6W
- Compatible remote control: T1/T2/T2M/T3/T3M/T3X
- Working temperature: -30℃~55℃
- Dimension: L175×W44×H30(mm)
- Package size: L178×W48×H33mm
- Weight (G.W.): 150g

2. Product Size:

3. The learning ID method of remote control:

Learning ID:

1. Turn on the receiver and remote control
2. Short press "ID learning button" on the receiver, the running light keeps on, then long press any keys (except on/off key) on the remote, the running light returns to flash (the buzzer long beep, the indicator light flashes 3 times), activated successful.

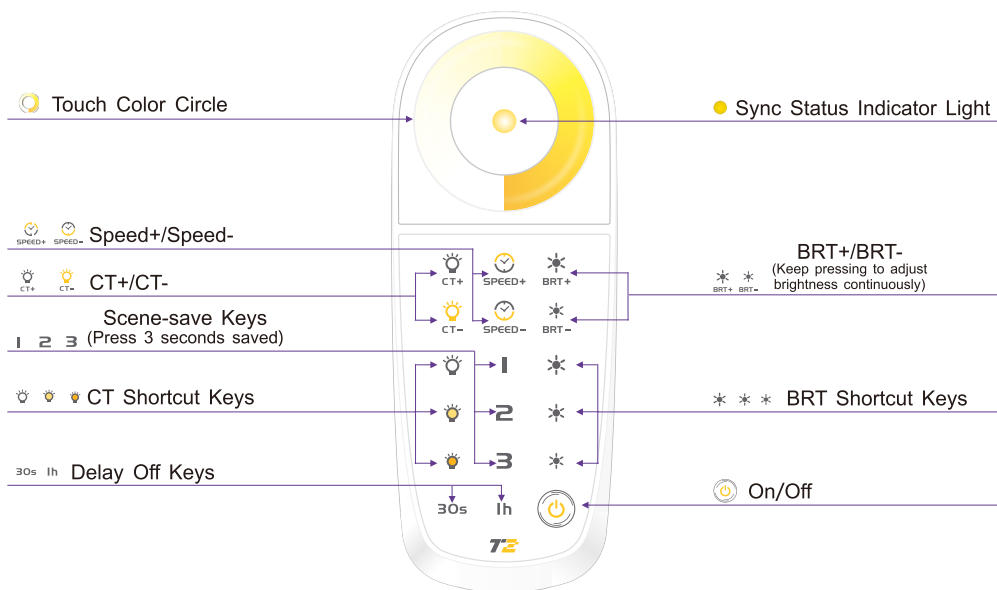

If you want to control multiple receivers synchronously, just follow the above instructions for each receiver.

Cancelling ID:

1. Turn on the receiver and remote control.
2. Press "ID learning button" on the receiver more than 8 seconds, the buzzer beep twice, delete all the learned remote.

4. Components Description for Receiver and Remote Control:

★press "DELAY OFF KEY" 30s in 3 seconds, the buzzer can be on or off.

5. Other Special Functions:

A. Reset Function:

Feature: Reset function is available when remote operates abnormally.

Operation: Long press  simultaneously, release the 2 keys after 3 seconds, the remote will auto off, means reset completed. and then could restart the remote.

B. Check and Edit the Frequency Point on the Remote:

Feature:

- Revising the frequency point to eliminate the external disturbance. 12 revisable frequency points for user.
- Multiple remotes sync-control becomes available when they use the same frequency point.

Attn: After reset or revised the frequency points in the remote, receivers only can be used after relearn the ID.

Check the Frequency Point on the Remote:

Turn on the remote, long press the on/off key  for 5 seconds until the red light  flashes 3 times, and then the green light  flashes, the numbers of the green flash will be the frequency point of the remote. you can only edit the frequency point after 3 seconds.

Edit the Frequency Point on the Remote: In frequency changing state

Method 1: short press any key from 1-9, the frequency point will be 1-9 correspondingly, the green light will flash in the same numbers. Press again any key or touch the color circle to exit the frequency edit state.

Frequency
Rate

Method 2: long press "on/off" key  over 5 seconds, the green light  flashes, the flash times plus 1 means the frequency point accumulate 1. In short, long press the "on/off" key  5 seconds each time, the frequency point will accumulate 1, which will again become value 1 when added to 12, and that cycle repeats.

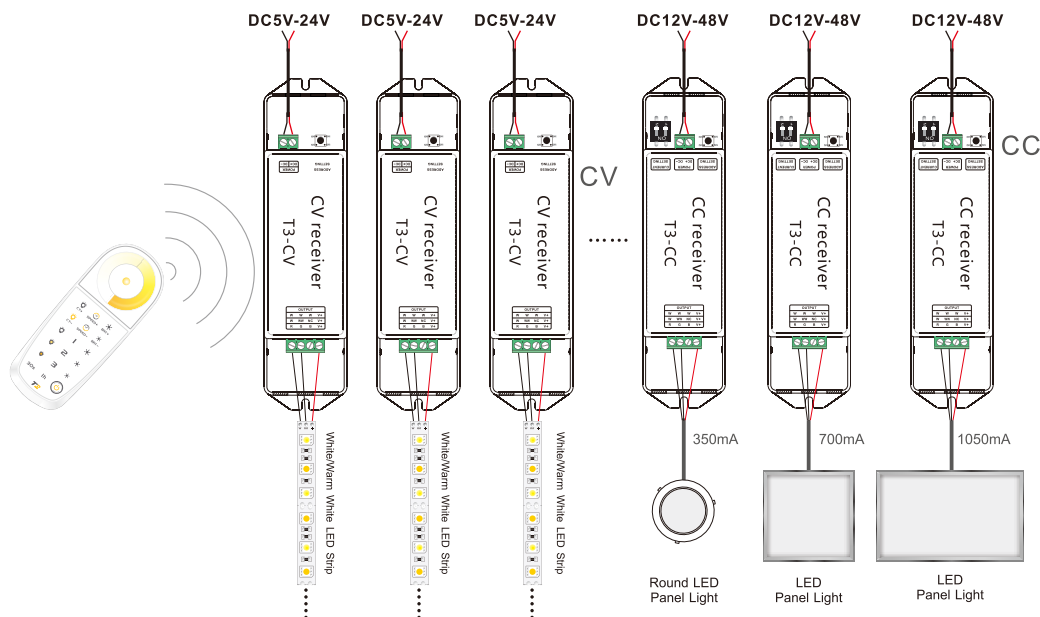

6. System Diagram:

Unlimited receivers can be installed within effective distance, no wiring needed between the receivers, which can be less or more in quantity according to your need for the installation, if you want to increase or decrease the receivers, just activate or cancel the control ID on the remote control will be fine, no any changes and effects on the other receivers.

No quantity limited of the receivers.

7. Wiring Diagram:

8. The Charging Methods for Remote Control:

1. When charging, please connect USB cable to the mobile charger or computer with the USB interface.
2. The blue indicator light flickers while charging, and turns green means the charging is completed. The remote control can be chargeable even at the OFF state, on which the indicator light is black.
3. No memory effect in the lithium battery of remote control. Follow the standard charging procedure even for the first three times, no need over charge.
4. Red indicator light flickers meaning low battery and need to be charged. charging in low battery will affect life of battery.
5. The remote should be full charged and stored under low cold drying while a long time without being operated. And please full recharge every 3 months.

9. Attention:

1. The product shall be installed and serviced by a qualified person.
2. This product is non-waterproof. Please avoid the sun and rain. When installed outdoors please ensure it is mounted in a water proof enclosure.
3. Good heat dissipation will prolong the working life of the controller. Please ensure good ventilation.
4. Please check if the output voltage of any LED power supplies used comply with the working voltage of the product.
5. Please ensure that adequate sized cable is used from the controller to the LED lights to carry the current. Please also ensure that the cable is secured tightly in the connector.
6. Ensure all wire connections and polarities are correct before applying power to avoid any damages to the LED lights.
7. If a fault occurs please return the product to your supplier. Do not attempt to fix this product by yourself.

10. Warranty Agreement:

1. We provide lifelong technical assistance with this product:
 - A 5-year warranty is given from the date of purchase. The warranty is for free repair or replacement and covers manufacturing faults only.
 - For faults beyond the 5-year warranty we reserve the right to charge for time and parts.
2. Warranty exclusions below:
 - Any man-made damages caused from improper operation, or connecting to excess voltage and overloading.
 - The product appears to have excessive physical damage.
 - Damage due to natural disasters and force majeure.
 - Warranty label, fragile label and unique barcode label have been damaged.
 - The product has been replaced by a brand new product.
3. Repair or replacement as provided under this warranty is the exclusive remedy to the customer. LTECH shall not be liable for any incidental or consequential damages for breach of any stipulation in this warranty.
4. Any amendment or adjustment to this warranty must be approved in writing by LTECH only.

★This manual only applies to this model. LTECH reserves the right to make changes without prior notice.
